

Manchester School Dental Program

The Manchester Health Department Dental Van will be visiting Parker-Varney School the week after Thanksgiving break. Dental care (including dental exams, x-rays, cleanings, fluoride treatments, sealants, fillings for minor cavities as needed and referrals for additional and regular dental care) will be provided to qualifying students at school by experienced, local dentists, dental hygienists and dental assistants through a collaboration of the City of Manchester Health Department Oral Health Program, Easter Seals Dental Center and Catholic Medical Center Poisson Dental Facility.

If you did not fill out a permission form at the beginning of the year, or are new to Parker Varney and would like to have your child seen on the dental van, please request that a permission form be sent home with your child from the school nurse, fill it out and promptly send it back to school with your child. Qualifying children will be seen and updates sent home after every visit.

If you would like more information about the School Dental Program please call # 624-6466 ext. 315.
